Work

bp

Jul 2022 – Present

Senior Frontend Developer   www.linkedin.com/company/bp

By simplifying end-to-end fleet management and offering guidance on how to decarbonize their fleet, a one-stop digital platform operating on BP's Superfleet platform assists fleet managers who want to maximize the efficiency of their fleet. This frees up time to expand their business in a Net Zero world.

- I contributed to the Notification Team (Squad), ensuring that Superfleet users may improve their platform experiences by not missing any action or insight made on the platform.
- I was a part of the Audit Trail Team, whose job it was to keep a log of all the platform's users' past actions.
- Involvement in Domains Team, managing high-level monorepo architecture for efficient team development and CI/CD pipelines

NX | React.js | Typescript | Webpack | Node.js | Azure Devops

HuntersOfBook

Apr 2021 – Jun 2022

Full Stack Engineer

Full Stack Engineer

HuntersOfBook is a community for avid readers who want to meet new individuals who share their interest in books.

Technically I:

- Created a storybook-like representation of UI elements to streamline frontend development,
- Created a simple WYSIWYG editor for platform articles Used GraphQL for Integration Between Backend and Frontend Services

GraphQL | Typescript | Vue.js | Node.js | Nest.js | Tailwind | Javascript

IGIHE AND SIGNA LTD   Jul 2020 – Mar 2021

QA Engineer

I have used Golang to perform stress testing, during which I was required to send 10,000 requests per second, and I have conducted both Blackbox and Whitebox tests on the API level and the frontend.

GoLang | Typescript | Javascript | Postman

Kurious ltd   Jan 2019 – May 2020

Frontend Engineer   www.linkedin.com/company/kurious-ltd

Kurious is an online learning platform that competes with public alternatives like Coursera and Edx but is exclusive to independent educational institutions.

- Many of the front-end tools that enable colleges to provide video and textual materials to students were created by me.
- I built a front-end messaging service that lets people have a group or individual conversations in real-time, whether in school or not.

Vue.js | Nuxt.js.| Typescript | Docker | MongoDb| Node.js | SCSS

Future Skills Bootcamp   Dec 2019 – Dec 2019

Web Development Mentor

During my time in the program, I helped teach programming concepts to around three hundred and fifty under 18 children.

On of the skills covered was:

- HTML
- CSS
- Javascript
- PHP
- SQL

Stunnity   Jul 2017 – Jan 2019

Software Developer   www.linkedin.com/company/stunnity

- Published NPM packages, worked on and published Figma and XD plugins, and created a variety of
  Laravel-based APIs

- Laravel-based APIs
- Designed and implemented several user interface elements in Vue.js, with a focus on the e-book hosting service Stunlab.

Education

Rwanda Coding Academy
Dec 2019 – Jul 2022
